AVERY
Zweckform

Quality makes all the difference.

THINK & CARE

We live RESPONSIBILITY – and have been for many years!

At Avery Zweckform, we have been continuously working for many years to take our share of responsibility for other human beings and for the environment - long before the Friday for Future movement even started. We believe that it's not the big hooray that counts so much, but rather the many little steps that help us make our business a little better and a little more responsible every single day: for our customers, for our environment and for our employees.

1. RESPONSIBILITY for the environment:

Recycled products:

For more than 30 years we have been offering recycled form books, and for a few years now, we also offer a large range of recycled labels, some of which fulfil the strict criteria of the "Blue Angel", making them stand for particularly high environmental standards.

Products made of FSC® certified paper*:

Already in 2008, we have converted 900 of our standard label products from normal materials to paper from responsibly managed forests. This process has been covered by the strict regulations of the FSC®, this way we make sure that the wood required for the production of paper is re-afforested within a sustainable, recycling economy.

Environmental management at our site:

For many years, we have continuously reduced emissions and waste in our company in order to protect men, air, water and soil. For example, we use environmentally friendly toners and varnishes in our production whenever possible. Since 2008, we could reduce the amount of our waste by more than 40%. All remaining waste is being environmentally friendly recycled or disposed. These measurements are regularly monitored and confirmed by independent testing institutes in accordance with the norms ISO 14001 and ISO 45001.

Use of environmentally friendly energy at our site:

Since 2014, we have been using exclusively eco energy and eco gas. Additionally, we are continuously working on projects to reduce the use of energy at our site, for example by switching to LED lighting or the investment and implementation of new, energy saving machines in the production.

*FSC®

For the large part of our products we use paper from responsibly managed forests. Look for the logo to identify FSC® certified products.

THINK & CARE

Climate-neutral site:

Since 2020, our site in Oberlandern is climate-neutral! Although our ecological footprint has already been pretty good compared to the industry, we have decided to level out the remaining CO₂ emissions completely by specifically supporting a forestation project in Brazil and a hydro-power project in Uganda. The support for these projects gives us the chance to actively take more responsibility for the environmental protection in South America and for a sustainable and economic development in Africa.

2. RESPONSIBILITY for people around us:

Inclusion project sheltered workshop:

15 years ago, we have intensified an existing cooperation by starting a pioneering inclusion project with the Oberland Behindertenwerkstätten (local sheltered workshop) at our site. Today, more than 20 people with disabilities work together with us in our production and logistic departments. These colleagues are entirely integrated in our daily working life, also using all our facilities at our site, e.g. the company canteen.

3. RESPONSIBILITY for our employees:

Health program:

We offer our employees an attractive and well-mapped out health program with offers in the area prevention and health promotion. These include for example health screens, massages, medical consultations and sport courses.

Bicycle Leasing:

We offer a bicycle leasing program for our employees to keep fit and healthy in their leisure time and/or on their daily way to work.

Healthy communal catering:

In our company canteen, we offer also organic and regional sourced food for a sustainable and healthy nutrition, of course exclusively on reusable dishes and cutlery. Additionally, we provide water coolers for the entire staff to avoid unnecessary packaging and transport of drinks.

Think&Care - that has been our path in the past and will continue to be our aim in the future.

That's why we continue to pursue even better and more responsible solutions: to unite ecological, social and economic goals and values in a meaningful and reasonable way while considering and fulfilling the needs and the requirements of our customers to the best of our abilities.

Our core goals in the area of ecological and social responsibility are:

1. Until 2025, we are striving for all our Avery Zweckform products to fulfil defined sustainability criteria. We want to continuously minimize the ecological footprint of our products.

The following sustainability criteria are the compass for our products and packaging. Each product should meet at least one of these criteria by December 31st, 2025:

www.blaue-engel.de/uz14b

The "Blaue Engel":

This is the most known German eco certification. The "Blaue Engel" guarantees that all paper fibres are obtained from 100% recycled paper without any addition of harmful chemicals or optical brighteners in the production process. Additionally, it secures a production of print products, for example our form books, with harmless toners and varnishes as well as low-emission adhesives.

100 % Recycled:

Paper material marked with this logo consists of 100% recycled waste paper. This saves our forests because not a single tree needs to be felled and valuable habitat for animals and plants can be preserved.

FSC® certified paper

This criteria marks products made of FSC® certified paper. FSC® certified paper is the most demanding label for products made of paper from sustainably managed forests.

Made in Germany or designed in Germany & produced in EU

Already today, the largest part of the processed raw materials, packaging materials and finished goods are from Germany or European neighbour countries - this means shorter transport routes, secure supply of goods and high quality standards.

In the course of the year 2021, we will by and by start to show these criteria as icons on our label packaging. Furthermore, we are working on additional sustainability criteria.

We are continuing to reduce and/or eliminate the use of non- and/or less environmentally friendly and harmful substances and materials in our products and packagings (e.g. PVC, chlorine, silicone etc.) wherever technologically, ecologically and economically sensible and feasible.

THINK & CARE

2. We support our customers to use their Avery Zweckform product from start to end responsibly and environmentally sustainably.

Apart from the production of a product, its usage (including disposal) also plays a substantial role for the eco balance of this product. That's why we show our customers how they can purchase and use Avery Zweckform products in a responsible and resource-saving way.

- We support the **testing and recommendation of particularly environmentally friendly products** and solutions.
- We research, work out and communicate ecological and **sustainable usage and/or disposal recommendations**.

How do I correctly dispose of labels?

- Our packaging consists of at least 80% recycled material and can be disposed of with the waste paper
- The disposal of labels depends on what kind of surfaces they stick: a paper envelope goes into the waste paper bin, a glass bottle goes into the glass container bank.
- The empty label sheet needs to go into the residual waste bin, because the recycling companies are unfortunately not yet able to separate the silicon layer from the paper. At least the energy from the incineration is fed back into the district heating system.

3. We offer our employees up-to-date and flexible working conditions that fulfil the ecological and social requirements of a modern society.

Within a society with a more and more digital and environmental awareness, Avery Zweckform is going to offer new solutions for working models, mobility and health:

- The introduction of new **mobile office concepts** offers the possibility to better reconcile the demands of professional and private life, also relieving commuter traffic.
- With the development of electric charging stations we **promote e-mobility** on our site. Additionally, we are changing our company fleet to environmentally friendly driving concepts.
- We will further develop our proven **health program**, that has very successfully been running for years, within a holistic health prevention & promotion approach and adapt it to the requirements of tomorrow.

Avery Zweckform - we will also take our RESPONSIBILITY into the future!

Easy and quick printing of your labels

- **Easy:** intuitive, clear online tool
- **Quick:** always available without installation
- **Free templates:** blank or pre-designed
- **Helpful functionalities:** mail merge, adding of logos & graphics, creation of bar codes

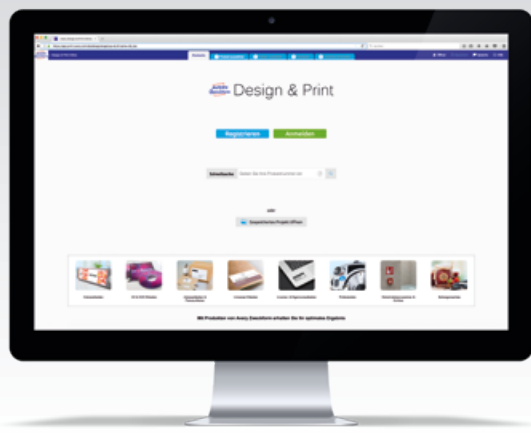

www.avery.eu/print

Enter software code (see packaging).

Choose either blank or pre-designed templates.

Print labels. Done!

**Choose from over
1.000 FREE
design templates:**

Lever Arch Filing Labels

Address Labels

Multipurpose Labels

Property Labels

Inspection Labels

Home-made

**You will find templates for many more products
in our Avery Design & Print software.**

Or create your own design – here some functionalities:

Adding of graphics,
images & logos

Adding/creation of texts

Mail merge for the easy creation of
address labels

Creation of bar codes, QR codes and
serial numbers

Transfer of designs to other
products possible

Saving of finished design in online
account or on your PC for later use

Label top material made of 100% recycled paper

NEW & INNOVATIVE:

Protect yourself, your employees, customers, patients or guests from infections: with the new and innovative Antimicrobial Labels from Avery Zweckform!

Overview over your advantages:

99.9% antimicrobial

- Removes 99,9% of all viruses, bacteria and germs.
- Tested in acc. with ISO 22196 (mod.) by independent institutes.

All-round protection

- The antimicrobial effect is activated by visible light and oxygen.
- This ensures a quick, permanent and long-lasting self-sterilizing effect.

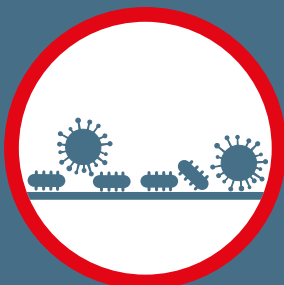

Long-lasting effectiveness

- Permanent effect for at least 1 year.
- Offers long-term and continuous protection, also when the film is cut to size.

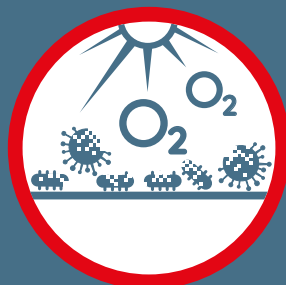

Heavy duty

- Water and tear proof
- Resistant to oil, cleaning agents and disinfections.
- Temperature resistant.
- This won't restrict the antimicrobial effect

Contamination of surfaces with bacteria, viruses, fungus and spores

The effect of the antimicrobial film is activated by visible light and oxygen

Germs are quickly and effectively deactivated – for complete and permanent hygiene

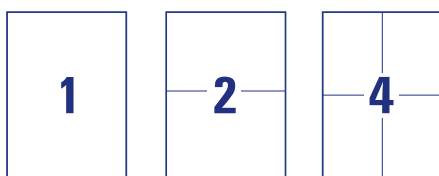

ANTIMICROBIAL LABELS for laser printers

Heavy Duty

- Film label with 99,9% antimicrobial effect: removes 99,9% of all viruses, bacteria and germs
- Permanent and long-lasting self-sterilizing effect, non-toxic, safe for health
- Permanent adhesion, suitable for doors, desks, books, light switches and many others
- Label can be partly printed or cut into different sizes without loss of effectiveness
- Antimicrobial effect clinically tested & proven by independent institutes

L8013-10

Can you print on the label?

The labels can be printed with all standard b/w laser printers or colour laser printers. However: less is more! If possible, the label should not be printed full face. Otherwise, the toner of the laser printer would cover the antimicrobial surface of the label completely or to such an extent that the effectiveness is not given any more in that area.

You can find free design templates in our software Avery Design&Print under avery-zweckform.eu/print

LABELS

P&S LABELS

INSPECTION LABELS FROM AVERY ZWECKFORM

- Easy marking of months and years with marker or punch pliers
- In practical dispenser bloc

Choose from the following materials:

Vinyl

- Extra heavy duty
- Resistant to water, oil, cleaning agents, disinfectants and solvents
- Temperature resistant to -20°C bis +80°C
- Strong, permanent adhesive for all kinds of different surfaces

NoPeel™ document film

- NoPeel™ labels, manipulation safe
- Disintegrate into small parts when being removed, making a label transfer impossible.
- Resistant to water, oil, cleaning- and disinfection agents and solvents
- Temperature resistant from -20°C to +80°C
- Permanent adhesive with excellent adhesion, suitable for all kinds of surfaces

INSPECTION LABELS WITH YEAR for handwriting

- Ideal for the permanent inspection labelling of electronic devices and non-electronic items
